

## The booster vaccination

- The Standing Committee on Vaccination recommends that everyone aged 18 or over should get a booster 'messenger RNA' vaccination.
- In order to be eligible for this you must have been given your second vaccination at least six months ago.
- Priority groups for the booster vaccination are:
  - People aged 70 or over,
  - People who live in care homes, social integration centres and other facilities for at-risk groups of people, or who are cared for or looked after in such facilities, as well as
  - people with weakened immune systems.
- When you come for your booster vaccination, please bring proof of having received your first and second vaccinations as well as an ID document.

## INFORMATION

### ABOUT THE CORONAVIRUS VACCINATION – EDITION 2.0

#### Youth and social affairs department

Special unit for refugees,  
integration, and state services

## Dear fellow citizens,

This leaflet provides you with important information about the coronavirus vaccination.

The vaccination is the most effective way of providing protection against coronavirus. Getting vaccinated can prevent you from suffering serious illness.

It will protect you and your family as well as other people, such as people with an existing illness and the elderly.

Vaccination is one of the simplest and most effective ways of providing protection against coronavirus.

Every vaccinated person helps to reduce the pressure on the healthcare system – for example in our hospitals. And so we will hopefully be able to gradually get back to normal.

It's important to build up long-lasting protection against coronavirus. This is achieved by lots of people getting themselves vaccinated.

### So please get yourself vaccinated!

Ulm, 19th November 2021

## Important information

### Who can have a vaccination:

- The Standing Committee on Vaccination (STIKO) recommends that everyone aged 12 and over should be vaccinated unless there are medical reasons for not doing so.

### Where can I get vaccinated?

- at your GP's/doctor's surgery
- at private healthcare clinics
- at your workplace medical facility
- at a local drop-in vaccination clinic

### Who pays for the vaccination?

- The vaccination is free.

### What documents do I have to bring with me to my vaccination appointment?

- Your vaccination certificate (if you have one)
- Your sickness fund membership card / information leaflet for showing to the doctor.
- An ID document (residence permit, temporary stay permit / exceptional leave to remain permit, passport etc.)

## The vaccination

- All the approved vaccines are effective and low-risk according to the latest scientific findings.
- In the case of most vaccines it's necessary to have a second vaccination a few weeks after the first one.
- Vaccinated people help to prevent the spread of coronavirus.
- In most cases, the vaccination provides protection from a serious illness
